

DOYLE SHEPHERD

Biography:

Born in the early 80's he first approached turntables at the age of 15 in 96 & constantly evolved skills. Back then he played hiphop, funk, break- & bigbeat with a healthy percentage of turntablism. His fascination for long and continuous mixing can already be heard in his early phonaddic tapes. After having access to some friends techno vinyl he immediately recorded his first technoset in 05. Let's say he got caught up by these more non-varying and constant rhythms right from the start. This fusion got even more intense after moving to berlin and soaking up the capital of techno. Effect: he ended up djing/producing deep, tech and minimal house and techno nowadays with many partners on the road & former residencies in venues like golden gate and chalet berlin plus he also played quite a number of (inter-)national by now.
